PROFESSIONAL SUMMARY

Software Engineer with a First-Class Honours degree in Computer Science, specialising in backend systems and full-stack development. Experienced in designing scalable applications with FastAPI, React, and PostgreSQL, with a strong focus on system reliability, API performance, and practical problem-solving. Built production-ready applications with complex scheduling logic and persistent data architecture and led teams of to deliver measurable operational improvements. Looking to apply backend engineering skills to high-performance systems across fintech, edtech, healthcare and other data-driven environments.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C#, Java, C
- **Frameworks & Libraries:** FastAPI, Flask, React
- **Frontend:** HTML5, CSS3, UX/UI Design
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools & Technologies:** Git, Docker, Linux, VS Code, Render, Vercel, Railway
- **Core Strengths:** REST API Development, System Design, Backend Architecture, Scalable Systems, Data Modelling, API Performance Optimisation

PROJECTS

StudyPulse – AI-Powered Adaptive Study Planner

FastAPI, React, TypeScript, PostgreSQL (Docker)

- Designed and implemented a deadline-aware scheduling engine that dynamically allocates study time based on workload, availability, and prioritisation constraints.
- Developed RESTful APIs using FastAPI with structured routing, validation, and error handling to ensure reliability and scalability.
- Modelled relational data in PostgreSQL (Dockerised), optimising queries and ensuring consistent state management.
- Architected the system to support future optimisation algorithms and AI-driven scheduling enhancements.

MotivateM3 – AI-Powered Motivation Platform

Python (Flask), Supabase, OpenAI API

- Built an AI-driven application that generates personalised responses based on user input via external API integration.
- Implemented efficient request handling and error management to ensure consistent system performance.
- Deployed the application on Render with persistent backend storage using Supabase.

Customer Relationship Management (CRM) System

C#, PHP, SQL

- Built a multi-user system to manage customer data and internal workflows across multiple roles.
- Implemented role-based access control to ensure data security and controlled system interactions.
- Identified and resolved concurrency and data consistency issues, improving system reliability under multiple users.

WORK EXPERIENCE

Operations Manager | Code Ninjas Cambridge

March 2024 – Present

- Designed and optimised scheduling workflows, improving resource allocation efficiency and reducing downtime by 20%.
- Led a team of 10+, applying structured problem-solving and process optimisation to improve operational performance by 25%.
- Implemented data-driven tracking systems for lead management and conversions, improving business growth and operational visibility.

Code Sensei / Lead Code Sensei | Code Ninjas Cambridge

January 2023 – March 2024

- Conducted technical code reviews and debugging across 50+ student projects, identifying logic flaws and improving program structure.

- Increased project completion rates by 30% through structured debugging guidance and problem-solving support.
- Translated technical concepts into clear explanations for non-technical stakeholders, improving client understanding and retention.

Sales Representative | TifeJoe Solutions, Lagos, Nigeria 2017 – 2019

- Delivered customer-focused solutions by analysing user needs and aligning them with appropriate products, while supporting inventory tracking and order fulfilment.

EDUCATION

Anglia Ruskin University — BSc (Hons) Computer Science , Graduated July 2026
First Class Honours (confirmed)

Relevant Modules: Software Engineering, Database Design, Artificial Intelligence, Cloud Computing, Embedded Computing, Operating Systems

Anglia Ruskin University College — Foundation Year, Computer Science Completed 2023

VOLUNTEERING & EXTRACURRICULAR ACTIVITIES

Course Representative | Anglia Ruskin University 2025 – 2026

- Represent student feedback to faculty, improving communication and academic experience.

Mentor – FXP & First Lego League | Code Ninjas Cambridge 2023 – 2024

- Mentored students in coding projects, providing debugging support and guiding problem-solving approaches.

Media Team Member | Kings Church Cambridge & RCCG City of David, Cambridge 2023 – 2026

- Supported livestream production and technical setup for events.

CERTIFICATIONS & TRAININGS

- MATLAB Onramp | MathWorks | 2025
- Exploring Networking with Cisco Packet Tracer | Cisco Networking Academy | 2025
- Foundations Course | The Odin Project | August 2024
- Python Programming Language & Java Technology | New Horizons | April 2021

CORE KNOWLEDGE

Data Structures & Algorithms • Operating Systems • Database Systems • Networking Fundamentals • Cloud Computing Basics

HOBBIES & INTERESTS

UX/UI Design, Blogging, Video Editing, Community Engagement, Fintech, Music.
